## Chemtrails, Geoengineering, Weather Modification & Weather Warfare

### Two Minute Excerpt From The Movie "Look Up" - Narrated By William Baldwin

February 6 2014 | From: [SkyderAlert](#)

"Look Up !" is the award winning film on GeoEngineering (Chemtrails). GeoEngineering and Weather modification programs pose the largest health and environmental threat our planet faces. Watch the 2 minute trailer below.

### TVNZ News - Jimi Hiki Features Chemtrail Plane In Weather Report

February 6 2014 | From: [TVNZ](#)

Whether Jim Hiki realised what he was showing on national television at the end of the 6pm news, we can't be sure. You can [see the clip here](#) (the plane shot is in the last 15 seconds).

The screenshot shows the TVNZ ONE News website interface. At the top, there's a weather widget for 06 Feb 2014 with temperatures 19° and 13°. Below is the TVNZ News header with navigation links like News, Weather, TV Shows, etc. The main content area features a large video player showing a weather report with a chemtrail plane. The video is titled "ONE News 6pm Weather Update: Feb 06 (5:04)". To the right of the video, there's a sidebar with "UP NOW" and "UP NEXT" sections. The "UP NOW" section lists the current video and its source. The "UP NEXT" section lists upcoming videos. Below the video player, there's a "LATEST NEWS" section with a list of articles, including "ONE News 6pm Weather Update: Feb 06 (5:04)".

### Mainstream Magazine Covers Climate Engineering

August 9 2014 | From: [GeoEngineeringWatch](#)

[SOCO Magazine](#) has shown exceptional journalistic courage by posting a featured article covering the ongoing geoengineering insanity.

The image shows the cover of a magazine titled "anAIR of DANGER". The background is a sky filled with numerous white chemtrails. The title "anAIR of DANGER" is prominently displayed in the center. Below the title, there's a subtitle: "Why are we modifying our global breathing space?". The cover also features a small image of a person's face in the bottom right corner.

This is a breakthrough in many ways as more publications are now likely to follow their lead. Climate engineering is an immensely grave danger to each and every one of us.

As journalists and publishers realize the geoengineering threat affects themselves and their families, censorship of the greatest untold story on the planet will breakdown. SOCO's publication of this article is a leap in the right direction for the

cause of exposing and stopping climate engineering.

[See the magazine article online at Issuu](#)

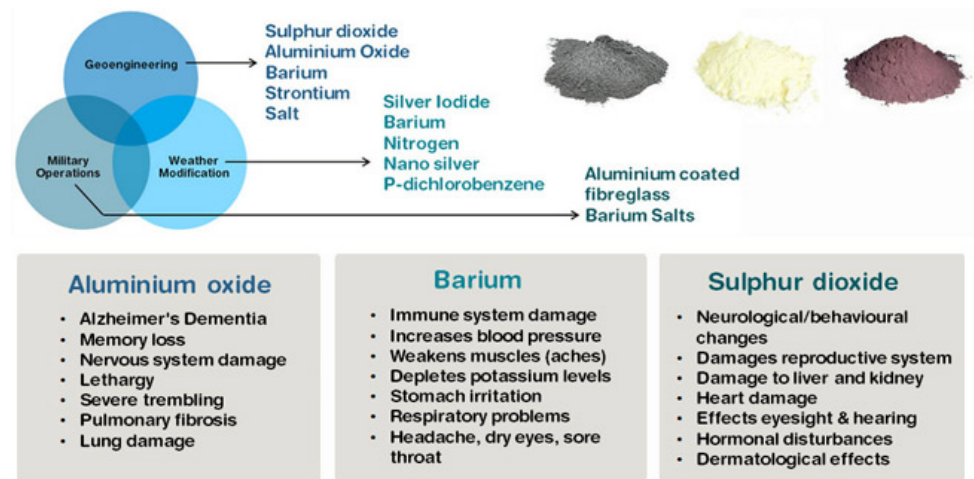

## NaturalSkies.org - An Excellent Weather Modification / Geoengineering Resource

September 13 2014 | From: [NaturalSkies](#)

**Our natural skies... fill with persistent contrails ...reducing sunshine and toxifying the air we breathe.**

Naturalskies.org, the easy-to-use website for information on: weather modification, geoengineering, atmospheric experimentation and the military's involvement over the control of our environment.

The diagram below features some of the principle chemicals that are used for various applications stated with in scientific literature. The following conditions are linked with the chemicals mentioned above, as stated with in medical literature. Consider the trends in some of these illnesses.

"The present vast overpopulation, now far beyond the world-carrying capacity, cannot be answered by future reductions in the birth rate due to contraception, sterilization, abortion, but must be met in the present by the reduction in the numbers presently existing. This must be done by whatever means necessary."

ECO '92 Earth Charter (United Nations)

## Chemtrails: What Are They Spraying?

### What Chemtrails Really Are

September 7 2011 | By Carolyn Williams Palit

Chemtrails actually have a number of uses and applications. In a nutshell, we are being sprayed with toxic concoctions of heavy metals and other nasty substances. The chemtrail mixtures are dispersed by both mission-specific aircraft and by being mixed into the fuel used by commercial airliners and cargo planes.

### **USAF Enviromental Specialist Kristen Meghan Blows Whistle On Chemtrails and Air Force Cover-Up**

At the 2013 Atlanta Music Liberty Fest, Kristen Meghan, former Air Force Industrial Hygienist / Environmental Specialist gave a groundbreaking presentation of what she discovered about chemicals used in Chemtrails while serving in the Air Force. Furthermore, she explains why she left the military after an attempt to silence her from speaking out on an operation at Warner Robbins AFB that "was exposing thousands of civilians to carcinogens" including strontium chromate – "a carcinogenic metal used in military operations." Kristen has spoken at many events now and is also a contributor at InfoWars.com

This brave young lady has put her livelihood / life on the line for U.S. Please take a minute to thank her and help U.S. by redistributing this video and any other VALID information about Chemtrails to as many people as you can! This is a GLOBAL issue, other countries must get this information as well.

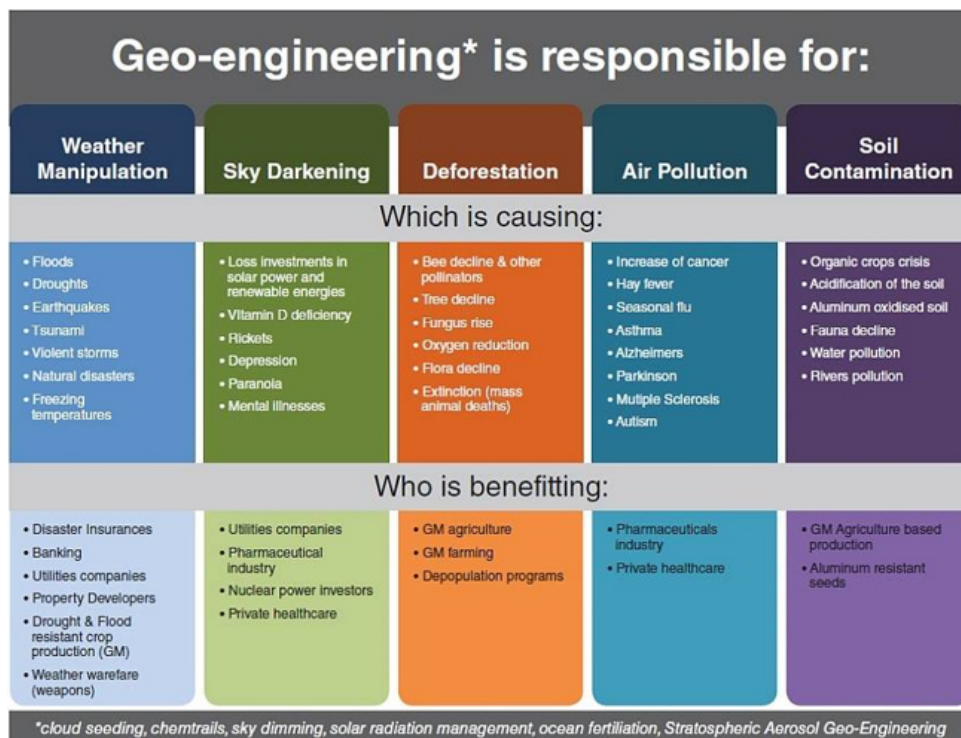

### **The Technology of Chemtrails**

Chemtrails create an atmosphere that will support electromagnetic waves, ground-based, electromagnetic field oscillators called gyrotrons, and ionospheric heaters. Particulates make directed energy weapons work better. It has to do with "steady state" and particle density for plasma beam propagation.

They spray barium powders and let it photo-ionize from the ultraviolet light of the sun. Then, they make an aluminum-plasma generated by "zapping" the metal cations that are in the spray with either electromagnetics from HAARP, the gyrotron system on the ground [Ground Wave Emergency Network], or space-based lasers. The barium makes the aluminum-plasma more particulate dense. This means they can make a denser plasma than they normally could from just ionizing the atmosphere or the air.

Click the image above to open a larger version in a new window

More density [more particles] means that these particles which are colliding into each other will become more charged because there are more of them present to collide. What are they ultimately trying to do up there -- is create charged-particle, plasma beam weapons.

Chemtrails are the medium - GWEN pulse radars, the various HAARPs, and space-based lasers are the method, or more simply:

Chemtrails are the medium -- directed energy is the method.

Spray and Zap.

This system appears to be in use in countries virtually all over the entire planet. Exotic weapons can be mobile, stationary, land-based, aerial, or satellite.

It is an offensive and defensive system against EM attacks and missiles. It uses ionospheric particle shells as defense mechanisms [like a bug-zapper shell]\* against missiles and EM attacks. That means they spray and then pump up the spray with electromagnetics. When these shells are created using the oscillating, electromagnetic, gyrotron stations, it "excludes" and displaces the background magnetic field.

These shells can be layered one above another in a canopy fashion for extra protection from missiles. The chemtrail sprays have various elements in them like carbon which can be used to absorb microwaves. Some of these sprays have metal flakes in them that make aerial craft invisible to radar. Spoofer sprays. Sprays like these can be used to create colorful, magnetized plasmas to cloak fighter jets.

There are satellite weapons involved. Activists are using meters and are getting readings of microwaves, x-rays, and some other kind of emission that they are not sure of, maybe a low-intensity laser.

**So you think it's all conspiracy do you? High-Def 1080p footage of Chemtrails over Melbourne, Australia**

They are also photographing gas plasma generation due to the heating of chemtrails by electromagnetics. The technical names for vertical and horizontal plasma columns are columnar focal lenses and horizontal drift plasma antennas. Various size of gas plasma orbs are associated with this technology. These orbs can be used as transmitters and receivers because they have great, refractory and optical properties. They also are capable of transmitting digital or analog sound. Barium, in fact, is very refractive -- more refractive than glass.

What does that mean? Someone or someones are very involved in unconstitutional, domestic spying and the entrained plasma orbs carried on electromagnetic beams can be used for mind control programming. The satellites can be programmed to track and monitor various frequencies on different parts of your body.

This satellite photograph showing at least 10 chemtrails dispersing was taken on Monday 4 May, 2015 over Wellington, New Zealand

These electromagnetic beams carrying the gas plasma orbs stick due magnetic polarity and frequency mapping and tracking to people's eyes, ears, temples, and private parts. A beam with entrained orbs carries pictures in each orb just like the different frames in a movie. It is a particle beam that is also a frequency weapon.

The satellites download holographic mind control movies, pictures, sounds, and sensations to people through this technology. The Air Force has stated in "Air Force 2025" that their goal is to develop virtual and augmented reality mind control. Depending on the how the computer is programmed or depending on the mood or intent of the person interfacing with the technology, you can be probed, bothered, gaslighted, frightened, manipulated, electronically raped, or tortured.

It scans your brain frequencies and deciphers your thoughts. The satellites track you by mapping your bioenergetic signature [body biometrics] and constantly scanning an area to find you.

We are the lab rats for this technology and something is very wrong in the military or intelligence branches somewhere. Because developmental projects in government and military are often so compartmentalized, I suppose someone could be using and developing this technology secretly and without authorization.

Then again, behavioral and mind control programs were an authorized policy under MKULTRA. Our country has a history of experimenting on its citizens. We are talking about satellite charged-particle frequency weapons attacking a person 24 hours a day. Psychotronic weapons are considered weapons of mass destruction by the U.N.

"HAARPs" can create earthquakes and can also x-ray the earth to find underground military bases, gold, or oil reserves. These ionospheric heaters can also operate as an over-the-horizon or under-the-ocean communications system. This system can control the weather or create disasters. Taken together with the aurora keyhole through-your-roof satellite surveillance system, Echelon electronic computer/phone sweeps, plasma-cloaked DOD Drug War helicopters and stealths, implants, and cameras on the street, it constitutes one, big global and space control grid.

These weapons involve beams. Two beams overlapped will couple into a particle-ion beam that will bounce off of a remote target and send a holographic image back to the satellite for remote spying operations. When you cross two strong beams, you can supposedly\* create scalar energies. These energies can be used as untraceable weapons for nuclear size explosions or for defense.

These crossed-energies can be used to cause a person's physical electrical system to fail or with a lower frequency, administer a kind of remote electro-shock. Visualize touching a positive and negative electric cable to each other on top of your head. Scalar energies can be utilized in hand-held military guns and on tanks. They can dud-out electronics or cause large, electrical blackouts. Scalar energies are practically impossible to shield against. You need lead, ceramics, and a deep underground facility to not be affected by these weapons. Or, you need to be up and above the field of battle.

People who are working on these issues hear tones and hums. If you hear persistent tones and static; have body vibrations, burning sensations, "bangs" to the head, neurological damage, or immune system damage; are hearing electronic voices or

hearing the sound of a plasma; suffering from pains deep in your organs or constant headaches; or experiencing other anomalous activity then you may be being targeted by directed energy, mind control weapons.

These weapons could be on helicopters, jets, stealth fighters, or on satellites. Directed energy beams and electromagnetic waves can be sent to you via hand-held devices or piggy-backed in on cell phone and satellite towers.

Is it possible that someone(s) are very afraid of coming famines and riots due to the ongoing, man-induced failure of the ecological system, and they are saturating the earth with chemtrails for large-scale, gas plasma mind control? Is this the last grasp for the world's resources? Or, are they just control freaks and money mongers? Someone would like to get to that oil under the melting [due to chemtrail-trapped EM heat] Artic. And, I guess the Third World is not a part of this system. I don't think that the developed nations are going to let them in on this either.

Any country that joins this NATO system will become mind-controlled and diseased due to the associated, intense, oscillating, electromagnetic fields, electromagnetic soup, and the poisonous, toxic chemtrails. Our DNA will break. We risk the earth's spin and tilt becoming messed up due to mucking around with the magnetic fields through this military technology. Maybe, it is already messed up.

It constitutes U.S. global domination via NATO and the erosion of civil rights. According to Charlotte Iserbyt and Al Martin, there are ex-KGB and ex-STASI advising our new Office of Total Information Awareness. They are the ones creating our new internal passports [national ID]. And under "The Treaty on Open Skies," we have overflights by Russian and German military.

Who exactly is flying those plasma-cloaked craft that are seen all over this country and mistaken for UFOs by people who do not know about this aerial deception technology? Obviously, we have another "Project Paperclip" in the making. We can add the new thugs to the 2,000 Iraqi brought into country by Daddy Bush who are now living in Nebraska.

The elitist corporate government is going to hold the rest of us hostage with directed energy weapons in space, if the Policy for a New American Century group - PNAC - Bush and cronie think tank has their way, along with directed energy attacks against any country or citizen that they decide they do not like. These weapons can create climate war, weather war, mind war, cyber war, disease war, disaster war, and undetectable war. Taken together they can create economic war.

If this system is not stopped, it will kill billions due to aluminum and barium poisoning. It will kill billions due to crop failures and world-wide famine. It will cause heart attacks, strokes, and cancers. It will cause stillbirths, miscarriages, and infertility.

The chemtrail sprays often have fungi, bacteria, viruses, dessicated red blood cells, crystalline substances, carbon, metal cations, lithium, other chemicals, heavy metals, and God knows what - probably smart dust, or nanocrap. Years of biowarfare testing on the American public is no big secret anymore. Spraying germs in the sky where they mutate due to the ultra-violet light -- brilliant plan, my man. Are we acceptable losses or is this by design?

I know that many of the major players have big investments in pharmaceutical companies, GM seeds [seeds that can grow in an electromagnetic soup], weapons and directed energy development contracts, oil contracts, genetic research, and mind control research.

Chemtrail filaments / fibres fell visibly and can be seen resting on a lawn in New Zealand on May 2 2014. Many people who have had these filaments land on their skin have developed Morgellon's disease, all around the world.

Some of these people have had a familial history of financial and policy support for population control, eugenics, Hitler, Mao, Stalin, Lenin, Marx, Pinochet, Hussein, and various other dictators. Some of the major players were the masterminds of the death squads in Central and South America. They stand to make a big profit on our death and disease. Just take a look at Rumsfeld and Tamiflu.

I assume that they know the dangers of this system and that they take care to stay in their shielded, air-filtered offices, homes, bases, and cars. I assume they take chelating substances to remove the barium and aluminum from their bodies and minds. If not, then they really do not understand the far-ranging implications of this destructive system. Congress may not understand just what a terrible weapons system and control grid they are funding.

This heavy chemweb fall was recorded in a field in New Zealand on May 17 2015

As I understand it, Tesla towers attached to deep-earth, free-energy taps are to be created over the 10-12 magnetic poles and the GWEN system phased-out. Has this already been done? This should allow total control of the earth through giant, Tesla death ray-guns. This natural, electromagnetic earth was not meant to be an un-natural dynamo to power man's weapons or his utility companies.

Over-unity systems [Tesla devices]\* are as of yet, another unexplored and probably not understood man-made energy. We should be very suspect of free energy. As we can see, the forms of man-made energy that have been created and used in the past have not been good for this planet. Maybe it is time to reconsider the options available to us through the development of crops for fuel, wind, solar, and water power. We need world-wide, different, more holistic, renewable, energy programs.

Is there any good news? Yes. There has been tons of particulate dumping through the spray operations for 8 years over the Americas, Europe, Scandinavia, Eastern Europe, and from what I can find out, over Russia. And, what goes around blows around, right? So, these substances are probably actually global. It sure makes a ton of sense to spray poisonous elements in 24 NATO countries and let the substances be carried around the earth on the jet streams to poison yourself, your enemies, and all neutral and non-combatant countries.

Talk about making more enemies.

The water, air, and soil of all of these countries is so saturated with metal cations that these weapons freaks should be able to zap and mind f--k each other quite well now and as often as they wish. Once they have clobbered each other with light-saber beams for a few years and razed and scorched sections of the earth, they may start to realize that this foreign policy will lead to a defective human race and a rotten economy.

Do you think they will have knocked some sense into each other by then and will decide that non-proliferation and arms reduction is the more civilized and mature direction to take in world affairs? I doubt it, cause only idiots would have developed horrific, planet-killer weapons like these. But, I'll bet the rest of the planet will finally rise up and tell these juvenile delinquents to quit playing with those rayguns right this second.

After further thought on Bearden + -- a big over-unity and free energy proponent of Tesla technology that makes energy off of boiling the ionosphere or stealing electricity from the mis-named "vacumn" called Life, I have decided that Bearden is telling us some, if not most, of the truth. Same for Eastlund.

### **Must Watch: Climate Engineering Weather Warfare, and the Collapse of Civilization**

January 30, 2014 | [GeoEngineeringWatch](#)

Planet Earth is under an all out weather warfare assault.

Climate Engineering Weather Warfare, and the Collapse of Civilizati...  

In this video, Dane Wigington gives another presentation in Northern California on the harmful effects of Geoengineering, declaring that there is virtually NO NATURAL WEATHER due to the massive global climate engineering. The very essentials needed to sustain life on earth are being recklessly destroyed by these programs. This is not a topic that will begin to affect us in several years, but is now already causing massive animal and plant die off around the world, as well as human illness.

The debate over whether geoengineering programs are going on is now a moot point. We have more than enough data to confirm it. We have actual footage showing tankers spraying. The materials showing up on the ground are exactly the same materials mentioned in the numerous geoengineering patents and documents. Visit our website for a list of these government patents and documents.

Our skies today are simply not normal. Upon examination this cannot be denied. They are filled with nanoparticulates of heavy metals. But the skies have been filled with grid patterns for so long now that we are used to them and do not see them anymore. Sadly, the fact is that people do not look up.

To be clear, what we are seeing is not cloud seeding to increase rainfall. These particulates are designed to block the sun and move the jet stream. Dane explains how this is causing the drought and deluge being experienced around the globe.

Our atmosphere is nothing but a massive physics lab to geoengineering scientists who have no concern whatsoever about the consequences to humanity or any living thing, including themselves. The experiments are literally tearing the planet apart and destroying life on earth.

#### **Dane reports, among other things, on:**

- Geoengineering related climate disruptions, extreme drought and deluge
- Ozone depletion
- Methane release
- Drastic reduction in arctic sea ice
- Global oxygen content reductions
- Oceans on the brink of collapse
- Massive fish die offs
- 200 species becoming extinct every single day
- A drastic rise in Autism, Alzheimer's, and Dementia
- Crisis level forest reductions
- The sterilization of soils making it impossible for plants to grow without Monsanto's aluminum resistant seeds

Dane Wigington presents hard data which reveals what these catastrophic programs have done to our planet to date and what they will do if they are allowed to continue. Please take the time to watch this video, follow up with some investigation of your own on our site -- <http://www.geoengineeringwatch.org>, and share this information far and wide.

### **Geoengineering Earth, Exposing The Global Climate Modification Assault**

From: [GeoengineeringWatch](http://www.geoengineeringwatch.org)

**Governments around the world have long since fully deployed global climate engineering on a scale that cannot truly be comprehended. They decided (without public knowledge or consent) that they had the right to use the atmosphere of our planet to serve their own agendas which amount to nothing less than weather and biological warfare.**

On August 14th, 2015, there was a major event in Northern California that was organized for the purpose of exposing and halting the global climate engineering programs that are decimating our planet and the entire web of life. Numerous experts spoke out at this event including attorneys, former government scientists, a former defense industry technician, former military personnel, a prominent Northern California Neurologist, and a CEO for one of the largest environmental and engineering consulting firms in the world. Approximately 1000 people attended this event.

The video below is the primary PowerPoint informational presentation given at the event, "Engineering Earth, Exposing The Global Climate Modification Assault". This presentation was given by Dane Wigington, lead researcher for [geoengineeringwatch.org](http://www.geoengineeringwatch.org).

The emcee for this important event was John B. Wells, radio host for the highly acclaimed "Caravan to Midnight" show. John works tirelessly toward revealing the truth for the common good. His participation in the Northern California event was of immense benefit to the cause of exposing geoengineering. My deepest appreciation to John, to all the speakers that participated and shared their knowledge, to each and every activist that contributed countless hours, and of course our gratitude to all those that attended the event. Individuals came from locations as far away as Valdez Alaska and St. Louis Missouri. Read more [here](#).

Geoengineering Earth, Exposing The Global Climate Modification A...  

### **Research Material**

**HAARP (High Frequency Active Auroral Research Program)**

Project Woodpecker pertains to the Electron Cyclotron Resonance Heating Method which is designed to "alter the earth's magnetic field ...in order to modify weather, create or trigger earthquakes and volcanoes, spread viruses, create the phenomenon known as electromagnetic pulse (EMP), and, to modify behavior control among the populous."

#### [Project Woodpecker](#)

The HAARP (High Frequency Active Auroral Research Program) transmitter site located in Alaska, northeast of the town of Gakona, is believed to be "large enough to cover most of the Northern Hemisphere." Operated by the Department of the Navy, Department of the Air Force and the University of Alaska, it is also believed to be only one of a number of such sites--known as Ionospheric Research Instruments that are "scattered around the world, ... many of them here in the U.S.", which are capable of connecting with a much smaller GWEN (Ground Wave Emergency Network), which comprises "remotely controlled transmitter sites that have been built all over the U.S. in a grid pattern, with their antennas spaced about every 200 miles or so."

Coloured clouds or 'chem-bows' are a phenomena relating to chemtrails, geoengineering, HAARP and the artificial generation of earthquakes such as those that recently devastated Christchurch in new Zealand. The satellite image above showing HAARP in action the day of this earthquake:

Location of Wanaka within New Zealand  
 NZ Standard Time Mon, May 4 2015, 2:29:10 pm  
 Coordinates: 44°42'S 169°09'E  
 Magnitude 5.8  
 Depth 4 km  
 Location 30 km north-west of Wanaka  
 Agency WEL(GNS\_Primary)

Nikola Tesla conducted the original research on the Electron Cyclotron Resonance Heating Method. It is asserted that Tesla's work was "later expanded upon by not only Soviet scientists, but also by U.S. scientists, such as Bernard J. Eastlund [1] (scientist associated with the Atlantic Richfield Oil Company (ARCO). ARCO, according to tradition, was controlled by members of the Council on Foreign Relations, with Eastlund as the "front man," with a subsequent series of transferrals of the patent rights.

#### **Project Cirrus**

Project Cirrus was one of the first large-scale efforts to modify the weather by cloud seeding, culminating in the actual "steering" of a hurricane, with disastrous consequences. And of course, the responsible parties wormed their way out of court on a technicality! Seems to have set a precedent for getting away for illegal weather modification on a regular basis ever since.

[Project Cirrus Final Report](#)

[General Electric Research Laboratory - Internal Document - History of Project Cirrus](#)

#### **Engineering The Rollout Of Geoengineering**

The systematic pre-planned rollout of geoengineering and aerosol spraying of our skies is now in full swing. This attempt to roll chemtrails out to the general public was predicted and anticipated by many in the movement for years, but now we are seeing the actual implementation of the agenda. Chemical spraying nationwide has been relentless for years.

All of humanity has been watching planes dropping their sustained chemical trails which artificially start and stop whenever chemical barrels are empty or when perhaps the person or system controlling the release of these chemicals from the planes needs to. All of this has been happening in broad daylight.

[Special Issue: Geoengineering Research and its Limitations](#)

## Geo-Engineering Now Confirmed To Be Very Real, And It's Definitely Not Good For The Environment

April 12 2016 | From: [NaturalNews](#)

[If you mention geoengineering](#) to people you know, you're liable to either get a blank stare or an eye roll.

To most, the term is foreign, but to some who have heard about the concept as a "[conspiracy theory to control the weather](#)," they'll dismiss you as a loon.

Related: [Chemtrails, Geoengineering, Weather Modification & Weather Warfare](#)

But the fact is, their denial makes them look foolish, since [not only is geoengineering very real](#), but it's been looked at as a way to control weather and climate for decades.

In fact, as reported by *The Daily Sheeple*, [President John F. Kennedy](#) proposed creating the technology to control the weather back in 1961;

*"We shall propose further cooperative efforts between all nations in weather prediction and eventually in weather control,"* he said [in a speech to the United Nations General Assembly](#) on Sept. 25 of that year.

### Control Remains in the Conversation About Weather, Climate

In the 1990s there was a renewed effort by the U.S. government and, in particular, the Pentagon, to devise technology that would enable the military to use weather control as a weapon in certain theaters of operation.

An [August 1996 research paper](#) [PDF] presented to the Air Force's "Air Force 2025" project and titled, "*Weather as a Force Multiplier: Owning the Weather in 2025*," noted in the executive summary:

*"In 2025, US aerospace forces can 'own the weather' by capitalizing on emerging technologies and focusing development of those technologies to war-fighting applications. Such a capability offers the war fighter tools to shape the battlespace in ways never before possible.*

*It provides opportunities to impact operations across the full spectrum of conflict and is pertinent to all possible futures. The purpose of this paper is to outline a strategy for the use of a future weather-modification system to achieve military objectives rather than to provide a detailed technical road map.*

*A high-risk, high-reward endeavor, weather-modification offers a dilemma not unlike the splitting of the atom. While some segments of society will always be reluctant to examine controversial issues such as weather-modification, the tremendous military capabilities that could result from this field are ignored at our own peril.*

*From enhancing friendly operations or disrupting those of the enemy via small-scale tailoring of natural [weather](#) patterns to complete dominance of global communications and counterspace control, weather-modification offers the war fighter a wide-range of possible options to defeat or coerce an adversary."*

The paper also added that, at some point, "weather-modification will likely become a part of national security policy with both domestic and international applications."

And remember, that was 20 years ago. Today, geoengineering remains a *thing*, and – as documented at [GeoEngineeringWatch.org](#) – is damaging our planet.

Today, as reported by the *Christian Science Monitor*, interest in geoengineering continues. Scientists say that one way to combat climate change is through [geoengineering](#), or "reshaping the planet in a substantial way," the news site reported.

But should we even want that? After all, who decides what the benefits would be, and could we even trust that the effort wouldn't backfire, thereby substantially polluting or otherwise harming the planet?

CSM further notes, for instance:

*"Geoengineering typically refers to mitigating [global climate change](#) either by removing carbon dioxide from the atmosphere or by preventing sunlight from warming the surface by reflecting it back into space."*

### Wait! Maybe Man is Causing Climate Change

Carbon dioxide, contrary to what the so-called "global warming hoaxers" would have you believe, is **vital to sustaining life on our planet**.

Think about it – if CO<sub>2</sub> were really a poison, why does it help plants grow so much?

Why is it a key part of the fundamental equation of biology: sugar + oxygen = carbon dioxide + water + heat?

**How is it that those in the environmental movement are ignorant of basic biology?**

As the website [PlantsNeedCO2.org](#) states, the more CO<sub>2</sub> around, the better plants grow:

*"In Idso and Idso's (1994) analysis of soil nutrient limitations, the percentage growth enhancement due to a 300-ppm rise in the air's CO<sub>2</sub> content actually did exhibit a slight (but statistically non-significant) decline, dropping from 51% to 45% when nutrients went from non-growth-limiting to limiting in a group of 70 experiments.*

*But when the atmospheric CO<sub>2</sub> enrichment was 600 ppm, this slight negative trend reversed itself, going from a CO<sub>2</sub>-induced growth stimulation of 43% when nutrients were present in abundance to a 52% enhancement when their supply was sub-optimal.*

*And for a 1200-ppm increase in atmospheric CO<sub>2</sub>, the percentage growth enhancement jumped from 60% when the soil nutrient supply was adequate to 207% when it was less-than-adequate."*

Without it, every living thing dies. What happens of geoengineering removes *too much carbon dioxide*, so that trees don't have enough to convert into oxygen?

*"Some argue we shouldn't even contemplate [geoengineering], as it's too dangerous to the planet," admits Dr. Karen Pinkus, incoming chair of the Faculty Advisory Board at the Atkinson Center for a Sustainable Future, at Cornell University, in an interview with the CSM.*

But she goes on to say that it should be part of the conversation: *"Climate change itself is the biggest geoengineering project ever undertaken, anyway, if you take 'mitigation' out of the definition."*

If you take into consideration the length of time geoengineering and "weather control" have been discussed by our own government – probably in conjunction with other governments as well – then [maybe Mankind is causing climate change after all](#). **just not in the way we're being told.**

### **Geoengineering WON'T Stop Global Warming, Warns Study**

June 9 2014 | From: [DailyMail](#)

**Geoengineering WON'T stop global warming, warns study;**

- ▶ This is according to a Canadian-led report that looked at 100 climate studies
- ▶ The authors found that some approaches are more promising than others
- ▶ These included forest management and geological storage of CO2
- ▶ Others are less appealing, such as filling oceans with iron to absorb CO2
- ▶ It follows a similar report in February that found schemes to deliberately manipulate the Earth's climate could prove useless, and at worst harmful
- ▶ This report found that geoengineering techniques would be unable to prevent surface temperatures from rising more than 2°C (3.6°F) by 2100

From aerosols that spray salt into the air, to machines that suck carbon from the atmosphere, scientists are conjuring up an increasing array of geoengineering techniques to battle climate change.

But this type of 'climate engineering' – which involves manipulating the natural processes after emissions have been released – will ultimately fail to help the world reach its emissions targets.

This is according to a new report authored by U.S. and Canadian researchers at six universities that argue tinkering with climate change isn't a viable long-term solution to global warming.

From aerosols iron fertilisation of the sea (left) to cloud seeding and greening deserts (right), scientists are conjuring up an increasing array of geoengineering techniques to battle climate change. But this type of 'climate engineering' will ultimately fail to prevent global warming, according to a new report

The report looked at a range of possible climate-altering approaches and concluded there is no way around it; governments have to reduce the amount of carbon being released into the atmosphere.

'Some climate engineering strategies look very cheap on paper,' said Dr Jonn Axsen, lead author of the study at Simon Fraser University in British Columbia, Canada.

'But when you consider other criteria, like ecological risk, public perceptions and the abilities of governments to control the technology, some options look very bad.'

Simon Fraser University professor Jonn Axsen has co-authored a new report on climate engineering to battle climate change. The report looked at a range of possible climate-altering approaches and concluded there is no way around it; governments have to reduce the amount of carbon being released into the atmosphere

The authors argue some approaches to climate engineering are more promising than others.

Strategies such as forest management and geological storage of carbon dioxide, for instance, may be useful if used alongside emission reduction.

Other climate engineering strategies are less appealing, such as fertilising the ocean with iron to absorb carbon dioxide or reducing global warming by injecting particles into the atmosphere to block sunlight.

'Take the example of solar radiation management, which is the idea of putting aerosols into the stratosphere, kind of like what happens when a large volcano erupts,' Dr Axsen said.

'This is a surprisingly cheap way to reduce global temperatures, and we have the technology to do it. But our study asked other important questions.'

#### POTENTIAL SIDE EFFECTS OF FIVE GEOENGINEERING STRATEGIES

**Afforestation:** This technique would irrigate deserts, such as those in Australia and North Africa, to plant millions of trees that could absorb carbon dioxide.

**Drawback:** This vegetation would also draw in sunlight that the deserts currently reflect back into space, and so contribute to global warming.

**Artificial ocean upwelling:** Engineers would use long pipes to pump cold, nutrient-rich water upward to cool ocean-surface waters.

**Drawback:** If this process ever stopped it could cause oceans to rebalance their heat levels and rapidly change the climate.

**Ocean alkalisation:** This involves heaping lime into the ocean to chemically increase the absorption of carbon dioxide.

**Drawback:** Study suggests it will have of little use in reducing global temperatures.

**Ocean iron fertilisation:** The method involves dumping iron into the oceans to improve the growth of photosynthetic organisms that can absorb carbon dioxide.

**Drawback:** Study suggests it will have of little use in reducing global temperatures.

**Solar radiation management:** This would reduce the amount of sunlight Earth receives, by shooting reflective sulphate-based aerosols into the atmosphere.

**Drawback:** Carbon dioxide would still build up in the atmosphere.

'What are the environmental risks? Will global citizens accept this? What country would manage this? Is that fair? Suddenly, this strategy does not look so attractive.'

The report was compiled over two years using research from more than 100 studies. It follows a similar report in February that found schemes to deliberately manipulate the Earth's climate could prove useless, and at worst harmful.

Researchers at the Geomar Helmholtz Centre for Ocean Research in Germany used software to test the potential benefits and drawbacks of five different geoengineering technologies.

Their study suggests that even when several technologies are combined, geoengineering would be unable to prevent average surface temperatures from rising more than 2°C (3.6°F) above current temperatures by the year 2100.

'The long-term consequences and side effects of these methods have not been adequately studied,' said Dr David Keller from the Geomar Helmholtz Centre for Ocean Research in Kiel, Germany.

One strategy, known as afforestation, would irrigate deserts, such as those in Australia and North Africa, to plant millions of trees that could absorb carbon dioxide.

Artificial ocean upwelling is another method that would use long pipes to pump cold, nutrient-rich water upward to cool ocean-surface waters. But if this process ever stopped, the researchers note that it could cause oceans to rebalance their heat levels and rapidly change the climate

However, this vegetation would also draw in sunlight that the deserts currently reflect back into space, and so contribute to global warming.

Artificial ocean upwelling is another method that would use long pipes to pump cold, nutrient-rich water upward to cool ocean-surface waters.

But if this process ever stopped, the researchers note that it could cause oceans to rebalance their heat levels rapidly changing the climate.

Another approach, known as ocean alkalisation, would heap lime into the ocean to chemically increase the absorption of

carbon dioxide.

Similarly a technique known as ocean iron fertilisation would dump iron into the oceans to improve the growth of photosynthetic organisms that can absorb carbon dioxide.

A final method, known as solar radiation management, would reduce the amount of sunlight Earth receives, by shooting reflective sulphate-based aerosols into the atmosphere.

This would cool the planet by reducing sunlight, but carbon dioxide would still build up in the atmosphere.

But more worryingly, the study reports that each geoengineering technique can have potentially serious side effects.

For example, the fertilisation of the oceans allowed plankton to remove CO<sub>2</sub> from the atmosphere, but also changed the size of ocean oxygen minimum zones.

Individually, each strategy reduces global warming by less than eight per cent, assuming carbon dioxide emission levels continue to remain at current levels.

One strategy, known as afforestation, would irrigate deserts, such as those in Australia and North Africa, to plant millions of trees that could absorb carbon dioxide

### Italian Senator Calls For Declassification Of Chemtrail Documents

April 18 2014 | From: [Infowars](#)

Have you noticed increased cases of Alzheimer's and Autism? The CDC recently admitted that autism numbers have doubled in a decade and more than 5 million Americans have a form of dementia.

While there are multiple contributors to these phenomenon, including the increased use of pesticides and herbicides, the decline of real food, and the degradation of our environment as a whole, it is likely chemtrails play a significant part in the cognitive decline of our nation as well.

Our politicians, however, refuse to comment on the subject, with the exception of a rogue informant often put swiftly back into his place by mainstream media and their puppeteers. Now, an Italian senator is demanding that important state secrets be declassified so that the world can understand what is really happening in the sky above.

Senator Domenico Scilipoti is not a champion for every Italian, often accused of taking party sides wherever it will benefit him personally, but he is aiming to abolish the classification of documents regarding the death of Ilaria Alpi, an Italian journalist killed in 1994 after she discovered radioactive toxic waste was being shipped to Somalia. There is a free documentary people can watch here, but it is not allowed in the US. Quite some censorship. Why?

The Senator wants chemtrail or weaponized weather documents to be declassified as well. The reason? Because through Vittorio Prodi, the USA signed a bilateral agreement on climate research. In 2003, former Minister Martino authorized the USAF to fly over Italian airspace. The Senator of the 'Forza Italia' party is now hoping to expose State Secrecy on chemtrails – the same ones we are still denying exist.

### **Rosalind Peterson Confirms Chemtrails / Geoengineering / SRM Are Very Real**

March 23 2014

If you are still in doubt that the lines in the sky are contrails or that the milky haze which lingers all day is nothing to worry about, then you are very mistaken.

Chemtrails, Here is your PROOF 100% Real "MUST WATCH"

---

### **HAARP - Chemtrails - How They are Change You - Bioengineering**

January 11 2013

How They Are Changing you . . . Cells and DNA . . . Against your will . . . This explains clearly what they are doing.

Chemtrails and nanotechnology are changing the world in which we live (Bioengineering). They are changing your cells and DNA against your will – dark change.

People will al become sterile and plants will not be able to reproduce - science will keep us alive and control us 100% (transhumanism) They will plunge our world into darkness.

---

### A Recommended National Program In Weather Modification

November 1966

From: [ICAS Report No. 10a - Federal Council for Science and Technology - Executive Office of the President](#)

This is a 90+ page report on the proposed testing and recommended program to introduce a worldwide weather modification program. As you read through you will see that the original purpose seems noble - to help the world with rain and reducing bad storms etc. However we see a foundation being laid and seeds being sown for the current monster that has been unleashed on the earth.

*Here is a quote from page 11-9:*

#### " Weather Modification and International Relations

The Commission believes that it would be highly desirable for the Government of the United States, in connection with the expansion of its program of weather and climate modification, to issue a basic statement as to how it views the relationship of this new national effort to the interests, hopes, and possible apprehensions of the rest of the world.

**The Commission further believes that emphasis upon international cooperation in the development of weather and climate modification programs will contribute substantially to scientific and technical progress and will also serve the national purpose of seeking to build a peaceful world order."**

" The Commission recommends the early enunciation of a national policy embodying two main points:

(1) that it is the purpose of the United States, with normal and due regard to its own basic interests, to pursue its efforts in weather and climate modification for peaceful ends and for the constructive improvement of conditions of human life throughout the world.

(2) that the United States, recognizing the interests and concerns of other countries, welcomes and solicits their cooperation, directly and through international arrangements, for the achievement of that objective. This cooperation should cover both research and operational programs of interest to other countries. It should be concerned not only with deliberate but also inadvertent human interventions in the atmosphere that affect weather and climate. Such a policy declaration could be issued by the President or incorporated in any basic legislation on the subject of weather and climate modification which the Congress may enact. "

After this noble gesture of involving the world, take a look at the legal recommendations here to cover the butts of those who carry out this program:

*Page 11-8*

#### "Legal and Legislative Aspects

The Commission recommends that the Federal Government by appropriate legislation be empowered to:

1. **Delay or halt all activities -- public or private -- in actual or potential conflict with weather and climate modification programs of the Federal government**, whether carried on by the government itself or by its grantees or contractors;
2. **Immunize** Federal agents, grantees, and contractors engaged in weather and climate modification activities from State and local government interference; and
3. Provide to Federal grantees and contractors **indemnification or other protection against liability** to the public for damages caused by Federal programs of weather and climate modification."

To sum this up the federal Government was recommended to be granted powers to delay or halt activities in conflict with weather and climate modification programs.

Also that all Federal agents, contractors and grantees (those funding geoengineering) would be given immunity from State and government interference! These same also would be granted indemnification or protection from the public for any damages caused by these programs.

If these legal recommendations have been put in place - it stinks. No wonder councils and governments are silent.

The same legal documents have been put in place for vaccine and drug companies, and it looks like evil food companies are given the same protection.

So guys we get a glimpse here of legally what has probably gone down for this worldwide program. Please read the whole document when you have time.

### What Chemtrails Really Are

November 9 2007 | From: [Rense](#)

"The United States does not torture." --President George W. Bush

We are dealing with Star Wars. It involves the combination of chemtrails for creating an atmosphere that will support electromagnetic waves, ground-based, electromagnetic field oscillators called gyrotrons, and ionospheric heaters. Particulates make directed energy weapons work better. It has to do with "steady state" and particle density for plasma beam propagation.

They spray barium powders and let it photo-ionize from the ultraviolet light of the sun. Then, they make an aluminum-plasma generated by "zapping" the metal cations that are in the spray with either electromagnetics from HAARP, the gyrotron system on the ground [Ground Wave Emergency Network], or space-based lasers. The barium makes the aluminum-plasma more particulate dense. This means they can make a denser plasma than they normally could from just ionizing the atmosphere or the air.

### Video Documentation Reveals Commercial Aircraft Spraying Chem...

More density [more particles] means that these particles which are colliding into each other will become more charged because there are more of them present to collide. What are they ultimately trying to do up there -- is create charged-particle, plasma beam weapons.

Chemtrails are the medium - GWEN pulse radars, the various HAARPs, and space-based lasers are the method, or more simply:

Chemtrails are the medium -- directed energy is the method.

Spray and Zap.

This system appears to be in Russia, Canada, the United States, and all of Europe. Exotic weapons can be mobile, stationary, land-based, aerial, or satellite.

It is an offensive and defensive system against EM attacks and missiles. It uses ionospheric particle shells as defense mechanisms [like a bug-zapper shell]\* against missiles and EM attacks. That means they spray and then pump up the spray with electromagnetics. When these shells are created using the oscillating, electromagnetic, gyrotron stations, it "excludes" and displaces the background magnetic field.

These shells can be layered one above another in a canopy fashion for extra protection from missiles. The chemtrail sprays have various elements in them like carbon which can be used to absorb microwaves. Some of these sprays have metal flakes in them that make aerial craft invisible to radar. Spoofer sprays. Sprays like these can be used to create colorful, magnetized plasmas to cloak fighter jets.

There are satellite weapons involved. Activists are using meters and are getting readings of microwaves, x-rays, and some other kind of emission that they are not sure of, maybe a low-intensity laser.

They are also photographing gas plasma generation due to the heating of chemtrails by electromagnetics. The technical names for vertical and horizontal plasma columns are columnar focal lenses and horizontal drift plasma antennas. Various size of gas plasma orbs are associated with this technology. These orbs can be used as transmitters and receivers because they have great, refractory and optical properties. They also are capable of transmitting digital or analog sound. Barium, in fact, is very refractive -- more refractive than glass.

What does that mean? Someone or someones are very involved in unconstitutional, domestic spying and the entrained plasma orbs carried on electromagnetic beams can be used for mind control programming. The satellites can be programmed to track and monitor various frequencies on different parts of your body.

These electromagnetic beams carrying the gas plasma orbs stick due magnetic polarity and frequency mapping and tracking to people's eyes, ears, temples, and private parts. A beam with entrained orbs carries pictures in each orb just like the different frames in a movie. It is a particle beam that is also a frequency weapon.

The satellites download holographic mind control movies, pictures, sounds, and sensations to people through this technology. The Air Force has stated in "Air Force 2025" that their goal is to develop virtual and augmented reality mind control. Depending on the how the computer is programmed or depending on the mood or intent of the person interfacing with the technology, you can be probed, bothered, gaslighted, frightened, manipulated, electronically raped, or tortured.

It scans your brain frequencies and deciphers your thoughts. The satellites track you by mapping your bioenergetic signature [body biometrics] and constantly scanning an area to find you.

We are the lab rats for this technology and something is very wrong in the military or intelligence branches somewhere. Because developmental projects in government and military are often so compartmentalized, I suppose someone could be using and developing this technology secretly and without authorization.

Then again, behavioral and mind control programs were an authorized policy under MKULTRA. Our country has a history of experimenting on its citizens. We are talking about satellite charged-particle frequency weapons attacking a person 24 hours a day. Psychotronic weapons are considered weapons of mass destruction by the U.N.

"HAARPs" can create earthquakes and can also x-ray the earth to find underground military bases, gold, or oil reserves. These ionospheric heaters can also operate as an over-the-horizon or under-the-ocean communications system. This system can control the weather or create disasters. Taken together with the aurora keyhole through-your-roof satellite surveillance system, Echelon electronic computer/phone sweeps, plasma-cloaked DOD Drug War helicopters and stealths, implants, and cameras on the street, it constitutes one, big global and space control grid.

These weapons involve beams. Two beams overlapped will couple into a particle-ion beam that will bounce off of a remote target and send a holographic image back to the satellite for remote spying operations. When you cross two strong beams, you can supposedly\* create scalar energies.

These energies can be used as untraceable weapons for nuclear size explosions or for defense. These crossed-energies can be used to cause a person's physical electrical system to fail or with a lower frequency, administer a kind of remote electro-shock. Visualize touching a positive and negative electric cable to each other on top of your head. Scalar energies can be utilized in hand-held military guns and on tanks.

They can dud-out electronics or cause large, electrical blackouts. Scalar energies are practically impossible to shield against. You need lead, ceramics, and a deep underground facility to not be affected by these weapons. Or, you need to be up and above the field of battle.

People who are working on these issues hear tones and hums. If you hear persistent tones and static; have body vibrations, burning sensations, "bangs" to the head, neurological damage, or immune system damage; are hearing electronic voices or hearing the sound of a plasma; suffering from pains deep in your organs or constant headaches; or experiencing other anomalous activity then you may be being targeted by directed energy, mind control weapons.

These weapons could be on helicopters, jets, stealth fighters, or on satellites. Directed energy beams and electromagnetic waves can be sent to you via hand-held devices or piggy-backed in on cell phone and satellite towers.

Is it possible that someone(s) are very afraid of coming famines and riots due to the ongoing, man-induced failure of the ecological system, and they are saturating the earth with chemtrails for large- scale, gas plasma mind control? Is this the last grasp for the world's resources?

Or, are they just control freaks and money mongers? Someone would like to get to that oil under the melting [due to chemtrail-trapped EM heat] Artic. And, I guess the Third World is not a part of this system. I don't think that the developed nations are going to let them in on this either.

Any country that joins this NATO system will become mind-controlled and diseased due to the associated, intense, oscillating, electromagnetic fields, electromagnetic soup, and the poisonous, toxic chemtrails. Our DNA will break. We risk the earth's spin and tilt becoming messed up due to mucking around with the magnetic fields through this military technology. Maybe, it is already messed up.

It constitutes U.S. global domination via NATO and the erosion of civil rights. According to Charlotte Iserbyt and Al Martin, there are ex-KGB and ex-STASI advising our new Office of Total Information Awareness. They are the ones creating our new internal passports [national ID].

And under "The Treaty on Open Skies," we have overflights by Russian and German military. Who exactly is flying those plasma-cloaked craft that are seen all over this country and mistaken for UFOs by people who do not know about this aerial deception technology? Obviously, we have another "Project Paperclip" in the making. We can add the new thugs to the 2,000 Iraqi brought into country by Daddy Bush who are now living in Nebraska.

The elitist corporate government is going to hold the rest of us hostage with directed energy weapons in space, if the Policy for a New American Century group - PNAC - Bush and cronie think tank has their way, along with directed energy attacks against any country or citizen that they decide they do not like. These weapons can create climate war, weather war, mind war, cyber war, disease war, disaster war, and undetectable war. Taken together they can create economic war.

If this system is not stopped, it will kill billions due to aluminum and barium poisoning. It will kill billions due to crop failures and world-wide famine. It will cause heart attacks, strokes, and cancers. It will cause stillbirths, miscarriages, and infertility.

The chemtrail sprays often have fungi, bacteria, viruses, dessicated red blood cells, crystalline substances, carbon, metal cations, lithium, other chemicals, heavy metals, and God knows what - probably smart dust, or nanocrap. Years of biowarfare testing on the American public is no big secret anymore. Spraying germs in the sky where they mutate due to the ultra-violet light -- brilliant plan, my man. Are we acceptable losses or is this by design?

I know that many of the major players have big investments in pharmaceutical companies, GM seeds [seeds that can grow in an electromagnetic soup], weapons and directed energy development contracts, oil contracts, genetic research, and mind control research.

Some of these people have had a familial history of financial and policy support for population control, eugenics, Hitler, Mao, Stalin, Lenin, Marx, Pinochet, Hussein, and various other dictators. Some of the major players were the masterminds of the death squads in Central and South America. They stand to make a big profit on our death and disease. Just take a look at Rumsfeld and Tamifu.

I assume that they know the dangers of this system and that they take care to stay in their shielded, air-filtered offices, homes, bases, and cars. I assume they take chelating substances to remove the barium and aluminum from their bodies and minds. If not, then they really do not understand the far-ranging implications of this destructive system. Congress may not understand just what a terrible weapons system and control grid they are funding.

As I understand it, Tesla towers attached to deep-earth, free-energy taps are to be created over the 10-12 magnetic poles and the GWEN system phased-out. Has this already been done? This should allow total control of the earth through giant, Tesla

death ray-guns. This natural, electromagnetic earth was not meant to be an un-natural dynamo to power man's weapons or his utility companies.

Over-unity systems [Tesla devices]\* are as of yet, another unexplored and probably not understood man-made energy. We should be very suspect of free energy. As we can see, the forms of man-made energy that have been created and used in the past have not been good for this planet. Maybe it is time to reconsider the options available to us through the development of crops for fuel, wind, solar, and water power. We need world-wide, different, more holistic, renewable, energy programs.

Is there any good news? Yes. There has been tons of particulate dumping through the spray operations for 8 years over the Americas, Europe, Scandinavia, Eastern Europe, and from what I can find out, over Russia. And, what goes around blows around, right? So, these substances are probably actually global.

It sure makes a ton of sense to spray poisonous elements in 24 NATO countries and let the substances be carried around the earth on the jet streams to poison yourself, your enemies, and all neutral and non-combatant countries. Talk about making more enemies.

The water, air, and soil of all of these countries is so saturated with metal cations that these weapons freaks should be able to zap and mind f--k each other quite well now and as often as they wish. Once they have clobbered each other with light-saber beams for a few years and razed and scorched sections of the earth, they may start to realize that this foreign policy will lead to a defective human race and a rotten economy.

Do you think they will have knocked some sense into each other by then and will decide that non-proliferation and arms reduction is the more civilized and mature direction to take in world affairs? I doubt it, cause only idiots would have developed horrific, planet-killer weapons like these. But, I'll bet the rest of the planet will finally rise up and tell these juvenile delinquents to quit playing with those rayguns right this second.

After further thought on Bearden + -- a big over-unity and free energy proponent of Tesla technology that makes energy off of boiling the ionosphere or stealing electricity from the mis-named "vacumn" called Life, I have decided that Bearden is telling us some, if not most, of the truth. Same for Eastlund.
